Alphanumeric and Graphic displays

For our company, the user interface is a very important aspect and that is why we give the customer the opportunity to choose from a wide range of displays. As an alternative to the most modern and expensive TFT displays we can also provide cheaper solutions that use:

- Segment display
- Graphic LCD display
- Alphanumeric LCD display
- Small OLED display

Considering the stylistic variety of products on the market, it is essential for us to be able to get as close as possible to the customer's expectations, to do this we are able to provide products with different and customizable technical and aesthetic characteristics.
